

TEAM

Lucia and Yeray, 2SMR students from the IES Pérez Pulido institute.

BEFORE

LOCATION

The viewpoint is located in the location of **El Mirador Volcán de Tajogaite**, in El Paso, La Palma, S/C de Tenerife.

NOW

REASON FOR THE CHOICE

We have decided to make a visitor center right in the lava flows, to promote tourism in the area with views of the volcano and its flows.

AFTER

The first thing we did was take photos of the landscape, once the photos were taken, we analyzed it and set about making the plan of what the visitor center would be like.

DOCUMENT THE WORK DONE

The visitor center that we are going to make consists of 5 rooms, each one of them is identified in the image.

This flat is 60m long and 40m wide. In the bar/restaurant we will have typical food from the island, and in the store there will be souvenirs and products related to the events of natural phenomena.
